PRODUCTION NOTES

Order production begins upon payment in full. Placement of art in your design is a close approximation in regards to position, size and scale. OPTION will make every attempt to match your submitted artwork as closely as possible to the finished jersey. Designs, shapes, logo and other graphic elements that cross over seams can't be guaranteed to line up on the finished jersey. You, our customer, affirm that you have permission to use and reproduce the logos, symbols and branding contained in your provided design and art files. Option Studios Inc. and its affiliates will not be responsible for responsible for any infractions there of as to copyright and/or trademarks.

Please design your finished art files in Adobe Illustrator and save them in CMYK colorspace. Please convert all fonts and text to curves. If you have specific color requirements, please reference them as Pantone PMS colors. OPTION will guarantee color match within 10% accuracy.

EIIT/IESIGN

Each panel of the template is an editable clipping mask. Please select the area you would like to edit with the SELECTION TOOL (v) by double clicking the area and placing the artwork, logos, designs etc. there. Clicking off the live area will bring you back to normal editing mode and you will be able to double click the next panel to be edited. Repeat procedures until your design is finished.

OF QUESTIONS:

If you have questions regarding design and layout, please contact OPTION STUDIOS at the contact information provided on this template/worksheet. Please fill out and describe in detail any special considerations or fine details/concerns regarding your design to help us match your design in the final production as closely as possible.

5AVICES

Please change all text to curves and make sure that all of your design is in CMYK color space. Please save your files as editable Adobe Illustrator AI or EPS files. We use the latest version of the Adobe Suite. You may use raster images (TIFF or JPG) in your design but they are not editable. Bitmap images should be MINIMUM 100dpi at
